

Tube Pressure Tester BPT 200

Burst Pressure Testing.

Exact and Reliable

The semi-automatic Tube Pressure Tester TPT-10 provides the optimum solution for the visual weldseam leak test as well as for determining the bursting pressure of seam-welded tubes.

Verify your tube quality with our established and proven burst pressure testing equipment.

Technical Data

Standard equipment

- Tube supports
- Control cabinet with operator panel
- Hydraulic unit
- Tube deposit
- Base frame
- Safety cover
- Pneumatic unit
- PC Interface (optional)

Additional test equipment

- Microscope
- Dish grinding wheel equipment
- Dimensional measuring equipment for length, height and width
- Belly / crown measurement equipment

Performance

- Test pressure: max. 180 bar
- Tube height: 12 - 85 mm
- Tube width: 1.6 - 13 mm
- Tube length: 300 - 650 mm
- Effective test length: 200 - 550 mm
- Test emulsion: water / radiator antifreeze

Dimensions and weight

- Height: approx. 1715 mm
- Width: approx. 966 mm
- Depth: approx. 1358 mm
- Weight: approx. 350 kg

Electrics

- Electrical connection: 3x 400 VAC, 50 Hz + N + PE
- Control voltage: 24 VDC
- Fusing: 16 A
- Total connected load: 0,8 kVA
