

Schöler Check-Up

Nowadays, a stable production process is the foundation for success. Reduce the risk of unexpected production loss when using very dirty and worn out tools. Improve the tool life with a deep cleaning, a repair of defective parts, and the rework of profile parts. Send your roller sets to us for inspection free of charge during the promotional period from the beginning of May to the end of June.

Make an appointment now with your known contacts or by email: tooling@schoeler.de.

* The inspection of the tool is free of charge. New parts, rework, cleaning work and / or freight costs are not included
