

**Gearbox-Upgrade**  
RS3xx series

UP-TO-DATE DRIVES.  
MAXIMUM RELIABILITY.

You need a reliable gearbox?  
We have the perfect upgrade!

It is often hectic in modern production. Downtimes are to be avoided. They are a real strain on the nerves and lower productivity. A reliable technology is indispensable, so that everything runs smoothly and predictably. Our newly developed gearbox is therefore a must have for you!

Our high-speed tube cut-offs are designed for a long-term professional use and, at the same time, the highest precision. The ease of service plays an important role. In the long run, only up-to-date drives guarantees reliability in production.

**Preventive maintenance pays for itself:**

- ✓ no repair backlog
- ✓ improved operational safety and reliability
- ✓ the downtimes are minimized
- ✓ increased service life

**High Precision Machinery.**  
For Heat Exchanger Production.

Upgrade your gearbox  
and create maximum reliability for your production.
